

DAYTON INTERNATIONAL AIRPORT EMERGENCY CONTINGENCY PLAN

Dayton International Airport (DAY) has prepared this Emergency Contingency Plan pursuant to §42301 of the FAA Modernization and Reform Act of 2012. Questions regarding this plan can be directed to Mark Kowalski at Mkowalski@flydayton.com. DAY is filing this plan with the Department of Transportation because it is a commercial airport.

This plan describes how, following excessive aircraft apron delays and to the extent practicable, DAY will:

- Provide for the deplanement of passengers;
- Provide for the sharing of facilities and make gates available at the airport; and
- Provide a sterile area following excessive aircraft apron delays for passengers who have not yet cleared United States Customs & Border Protection (CBP).

Dayton International Airport has facility constraints that limit our ability to accommodate diverted flights or maintain the airport's safe operation and strongly encourages aircraft operators to contact the airport at 937-776-2194 for prior coordination of diverted flights, except in the case of a declared in-flight emergency. Specific facility constraints include the following: Limited ground equipment for deplaning remotely parked aircraft, limited availability of shared use gates and a small customs international passenger processing facility. During diversion events Dayton International Airport issues NOTAMs regarding its ability to accommodate diverted flights to ensure the safe and efficient operation of the airport and its ability to serve the civil aviation needs of the public during irregular operations events.

Airport Information

Name of Airport: Dayton International Airport

Name and title of person preparing the plan: Mark Kowalski, Operations and Maintenance Manager

Preparer contact number: 937-264-3502

Preparer contact e-mail: Mkowalski@flydayton.com

Date of submission of plan: August 2022

Airport Category: Large Hub Medium Hub Small Hub Non Hub

Contact Information

In the event of diversion or other irregular operations events, aircraft operators should contact the Airport Operations Supervisor at 937-776-2194 or ops@flydayton.com for assistance.

Plan to Provide for the Deplanement of Passengers Following Excessive Apron Delays

DAY does not own or operate any of the equipment needed to safely deplane passengers from air carrier aircraft and is, therefore, unable on its own to provide for the deplanement of passengers. Additionally airport personnel are not trained to assist in the deplanement of passengers using equipment owned or operated by air carriers or contract service providers. However, we have requested that each airline, ground handler and FBO operation on the airport provide us with a list of the equipment and resources they have for deplaning passengers and contact information. We will provide this inventory and contact information to airlines as soon as practicable after receiving requests from such airlines experiencing excessive apron delays at the contact number listed above.

Plan to Provide for the Sharing of Facilities and Make Gates Available in an Emergency

Most gates at DAY are under exclusive lease to air carriers and are not controlled by the airport during those time periods when the tenant airline is using or scheduled to use the gates. We are unable to direct a tenant airline to accommodate another air carrier aircraft at its exclusively leased gate during those time periods when the gate is in use or scheduled to be in use. We will direct our tenant air carriers to make gates and other facilities available to an air carrier seeking to deplane at these exclusively-leased gates during those time periods the gates are not in use or not scheduled to be in use, to the maximum extent practicable. Gates that are not part of an agreement may be available for use on a per turn basis. Permission to use these gates must be coordinated with DAY and granted by it.

Plan to Provide a Sterile Area for Passengers Who Have Not Cleared United States Customs and Border Protection

While DAY does have an international passenger processing facility, it is designed for GA aircraft and thus has very limited passenger processing abilities. DAY will coordinate with local CBP and law enforcement officials to establish a temporary sterile area into which international passengers on diverted aircraft who have not yet cleared United States Customs and Border Protection can be deplaned. Once these efforts are complete, we will coordinate with local CBP officials to develop procedures that will allow international passengers who have not yet cleared United States Customs and Border Protection to be deplaned into these sterile areas to the extent practicable.

Public Access to the Emergency Contingency Plan

DAY will provide public access to its emergency contingency plan through the following means:

- Posting in a conspicuous location on the airport website (<http://flydayton.com>)
